KUFM TO AIR CLIMATE CHANGE LECTURE BY MISSOULA NOBEL LAUREATE

MISSOULA –

KUFM-FM, the Montana PBS radio station based at The University of Montana, will broadcast a recent lecture by UM Nobel Peace Prize winner Steve Running on Friday, Nov. 30.

The lecture, "Five Stages of Climate Grief," will air at 1 p.m.

Running, a UM forestry professor and ecologist, earned a share of the Nobel Peace Prize by helping write the 2007 Intergovernmental Panel on Climate Change report, which presents strong evidence that humanity is artificially warming our world. He originally gave the public lecture to a packed University Center Ballroom on Monday, Nov. 26.

Running directs the Numerical Terradynamic Simulation Group in UM's College of Forestry and Conservation. He has been at UM since 1979 and has long worked to bring people information about the human impact on global warming and ways individuals can make a difference.

To read Running's "Five Stages of Climate Grief" essay, visit <http://www.ntsg.umt.edu>.
